AXLE PLAY DETECTORS - RECONDITIONING INSTALLATION

The plates are installed in recessed installation in an existing concrete Pit in their own sealed frames or in «upgrade».

The renovation works allows the replacement of the play detectors without doing again the civil work.

Thus, it is possible to replace only the play detectors and keep the remote control and the control cabinet.

CARACTÉRISTIQUES GÉNÉRALES	56000UPG-KP	56000UPG-KP-Z
Finishing		Zinc plated
Dimensions	865 x 665 mm	
Plate center distance	1770 mm	
Plates drive-by track min / max	900 mm / 2630 mm	
Counter plates displacement min / max	900 mm / 2630 mm (recommended)	
Displacement plate weight	190 kg	
Maximum load per axle	20000 kg	
Thrust force (unloaded)	3000 daN	
Thrust force (full oaded)	2700 daN	

OPTION

Ref. 123345 Hydraulic power unit
