

ECOBD100

EOBD DEVICE

ECOBD100 is the new diagnostic device for the latest generation of on-board vehicle emission control systems manufactured by MULLER AUTOMOTIVE.

Like ECORPM100, the OBD reader is completely autonomous. It can be powered from the OBD socket or the cigarette lighter socket. It is fitted with an LED light to help you identify where to connect it.

EOBD READER FUNCTIONS

This device stands out for its innovative features :

- Automatic detection of light and heavy vehicle protocols
- Automatic reading and transmission of engine speed
- Automatic reading and transmission of engine temperature
- Reading of ECU data and storage of fault codes.

ADVANTAGES OF THE EOBD READER

- Easy to use: an integrated LED light makes it easy to locate the vehicle's OBD socket, even in low-light conditions
- Portability: the wireless OBD reader can be moved around easily without the need for an external power supply
- Bluetooth connectivity: Thanks to Bluetooth connectivity, the reader can communicate with a variety of interfaces, making it easier to transfer and analyse data
